Features

- thread-cutting head Wagner Z 39, self-opening
- 3 sets of chaser die holders
- various chasers
- vert. tapper with quick clamping mechanism
- chaser holder fastening ring for Z39
- cooling system
- splinter shoot
- operating manual for Wagner head Z39

The rotational speeds of the spindle are changed by the transmission of the engine.

The cutting head is opened and closed by adjustable limit stops.

- If the year of construction has a "tüb."-date, that means the machine has been electrically and technically inspected by us on that date.
- If the year of construction has a "tüb."-date, that means the machine has been partially overhauled on that date according to the prior owner.
- If the year of construction is marked "*", it is the information the prior owner relayed to us or our own estimation.
